Appointed Company

Overview of project

Sidey were appointed to this project through SPA's U9 PVC-U Windows and Doors Products framework for Clackmannanshire Council. The project aim was to provide energy efficient products that would improve quality of life for the Council's tenants in over 500 properties throughout Clackmannanshire. This project was very successful with over 98% tenant satisfaction and won an award for excellent quality at the LHC 50 Awards.

Energy Efficiency

Sidey installed energy efficient Solartherm® products, which are manufactured using a UK supply chain for resin, extrusions and door slabs providing a low carbon fenestration solution with a short lead time. They carried out the manufacture, supply and installation of the windows and doors. Sidey's Solartherm® windows and doors provide EESSH standard performance to the residents whilst refreshing the appearance of the properties.

Partnership Working

Sidey placed long term sustainability ahead of short term gain when working with Clackmannanshire Council on this project as well as an added emphasis on tenant engagement. Each property was installed within one day to limit disturbance to residents and personalised, inclusive customer care packs were given out. In addition, to this Sidey donated windows for a games room for Play Alloa, Clackmannanshire's local disability charity.

Why SPA?

SPA provide a quick and easy route to market for public sector organisations, whilst ensuring their partners are complying with the Procurement Regulations in Scotland.

Sidey is using examples of our partnerships through SPA to help gain and build confidence throughout our tender process.

The fact that Sidey scored top for quality within both frameworks for WD1, and projects like the one carried out for Clackmannanshire Council, have helped to shape our future business and relationships by influencing the key decision makers to use Sidey”.

Steve Hardy

Sidey's Joint Managing Director of Sales & Marketing

About the WD1 framework

This project was delivered through SPA's U9 PVC-U framework, which has been amalgamated with the TW3 Timber framework to form the new WD1 Windows and Doors framework. Sidey Solutions Ltd have been appointed to both workstreams, U10 and TW4, on SPA's WD1 framework.

**LIKE ALL SPA FRAMEWORKS,
WD1 IS FULLY OJEU COMPLIANT.**
